

- The bootscan above detects small signals from BHV 1.1 strains Cooper (Blue) and Bovishield Gold FP5 (Red)
- It also shows large chunks of BHV 1.2 strain K22 (Pink)
- There is also one signal (green) from BHV-5

216_II accession matching BHV-5 segment

-The piece of BHV-5 detected in 216_II corresponds approximately to coordinates 81071-82601 in the MSA

-These coordinates correspond to coordinates 77613-79137 in 216_II itself

Source information for 216_II

```
/organism="Bovine alphaherpesvirus 1"  
/mol_type="genomic DNA"  
/isolate="216 II"  
/isolation_source="nasolacrymal duct of calf"  
/host="Bos indicus"  
/db_xref="taxon:10320"  
/country="India"  
/collection_date="31-Dec-1976"
```
